

Cordoba Minerals Secures the Guadalajara Project located within the San Matias Porphyry District

Vancouver, BC, April 28, 2014: Cordoba Minerals Corp. (TSX-V:CDB) (“Cordoba” or the “Company”) is pleased to announce that it has secured the rights to the Guadalajara Project located in the Department of Cordoba, Colombia that is interpreted as being highly prospective for porphyry style mineralization and displays extensive areas of varying porphyry-style alteration, and numerous gold-anomalous drainages.

The Guadalajara Project is a 2,000 hectare land package located 13 kilometres to the SSW of BHP Billiton’s Cerro Matoso open pit nickel mine and within seven kilometers of the Company’s San Matias Project (see Figure 1). The Guadalajara Project area is largely associated with intrusive rocks and mafic/intermediate volcanic rocks that display extensive zones of porphyry-style propylitic alteration and zones of diatreme breccia development and is therefore highly prospective for porphyry-style mineralization. To date the major diatreme breccia located is over one kilometre in strike and displays both volcanic and intrusive clasts with potassic-style alteration (magnetite and secondary biotite) associated with a matrix of phyllic and propylitic alteration styles. Stream sediment sampling in this area has shown numerous drainages with visible gold in pan concentrate samples.

Mario Stifano, CEO of Cordoba, commented: “The Company has been leveraging its geological knowledge and first mover advantage in this highly prospective and unexplored copper-gold porphyry district, by locking up what we believe is ground with the most potential for large copper-gold porphyry discoveries.”

Transaction Terms

Cordoba has paid an initial US\$50,000 payment on signing of the agreement with a commitment to spend US\$250,000 in exploration activities within one year. After completion of the exploration expenditures the Company will be granted the option to acquire a 98% interest in the Guadalajara Project under the following terms:

- I. A US\$150,000 payment on signing of a formal option agreement (the “Option Agreement”) with minimum exploration expenditures of US\$500,000 including 1,000m of drilling in the first year.
- II. A US\$250,000 payment 12 months after the signing of the Option Agreement with minimum exploration expenditures of US\$1,000,000 including at least 2,500m of drilling during the second year.
- III. A US\$350,000 payment 24 months after the signing of the Option Agreement with minimum exploration expenditures of US\$2,000,000 including at least 5,000m of drilling during the third year and completion of a NI 43-101 resource calculation by the end of the third year.

The Company will have the right to terminate the Option Agreement at any time without penalty.

On the completion of a Feasibility Study the Optionor will have the right to sell their remaining 2% stake in the Project for US\$5.00 per ounce of gold and US\$0.035 per pound of copper for such metals that are in the Measured and Indicated category of the NI 43-101 resource calculation. The Optionor will maintain 100% of the coal rights on the Property.

Forward-Looking Statements

This news release includes certain “forward-looking information” within the meaning of Canadian securities legislation. Forward-looking statements include predictions, projections and forecasts and are often, but not always, identified by the use of words such as “seek”, “anticipate”, “believe”, “plan”, “estimate”, “forecast”, “expect”, “potential”, “project”, “target”, “schedule”, “budget” and “intend” and statements that an event or result “may”, “will”, “should”, “could” or “might” occur or be achieved and other similar expressions and includes the negatives thereof. All statements other than statements of historical fact included in this release, including, without limitation, statements regarding the potential of the Company’s properties are forward-looking statements that involve various risks and uncertainties. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements are based on a number of material factors and assumptions. Important factors that could cause actual results to differ materially from Company’s expectations include actual exploration results, changes in project parameters as plans continue to be refined, future metal prices, availability of capital and financing on acceptable terms, general economic, market or business conditions, uninsured risks, regulatory changes, delays or inability to receive required approvals, and other exploration or other risks detailed herein and from time to time in the filings made by the Company with securities regulators. Although the Company has attempted to identify important factors that could cause actual actions, events or results to differ from those described in forward-looking statements, there may be other factors that cause such actions, events or results to differ materially from those anticipated. There can be no assurance that forward-looking statements will prove to be accurate and accordingly readers are cautioned not to place undue reliance on forward-looking statements which speak only as of the date of this news release. The Company disclaims any intention or obligation, except to the extent required by law, to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
